## DETAILED ACTION

### *Election/Restrictions*

1. The nonelected species of dependent Claim 11 directed to carbon nanotubes is rejoined pursuant to the allowability of independent Claim 23.

## EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Gorman on 4/2/2007.

The application has been amended as follows:

2.1 **Cancel** Claims 15-22.

2.2 In the TITLE, **delete** and **replace** with --Fuel Cell Collector Plates with Improved Properties--.

2.3 In the ABSTRACT, lines 1-3, **delete** first sentence and **replace** with --Conductive flow field separator plates having reduced resistivity, lower weight, and lower cost are disclosed.--

### **STATEMENT OF REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record known to the examiner is disclosed in the attached PTO-892 and 1449 forms. Takagi et al. (US Patent 7008991) teaches a thermoplastic resin composition containing both an amorphous and crystalline thermoplastic resin in addition to two types of conductive fillers. Takagi also teaches the possibility of using the composition to form molded articles. Takagi, however, discloses thousands of different resin combinations that could be used among which a liquid crystal polymer and maleic anhydride-styrene copolymer are only one combination that could be selected. Furthermore, Takagi teaches the composition to contain only a maximum of 15% of conductive filler whereas the instant claims require "about 20%." Takagi further teaches that use of more than 15% of the conductive filler leads to a deterioration of the mechanical properties of the composite and thus teaches away from the claimed ranges. Finally, Takagi does not teach the use of the composition to create flow field separator plates as required by the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
